## City of Durham Releases 2014 Drinking Water Quality Report

### *Zero Water Quality Standard Violations in 2014*

DURHAM, N.C. — The City of Durham's 2014 annual water quality report, "[\*Always Ready: Then and Now\*](#)," is now available on the City's [website](#). The report, required by the U.S.

Environmental Protection Agency (EPA), shows that the City had zero violations of any water quality standards in 2014.

"The Water Management Department has more than 300 employees who work to make sure clean, safe water is always ready for our customers when they turn on the tap," said Don Greeley, director of the City's Water Management Department. "We hope customers will read this report and get a better understanding of what it takes to provide this valuable resource, while learning more about the history of the City's water system."

The EPA requires all water systems to provide its water quality report to customers by July 1. Beginning in 2013, EPA regulations allow drinking water providers to distribute the report electronically. Customers can send an [email](#) or call (919) 560-4381 to request a copy by mail.

### **About the Water Management Department**

The [Water Management Department](#) is responsible for the operation and maintenance of Durham's water supply, water treatment and water reclamation (wastewater treatment) facilities, the collection and distribution systems (including meter reading), and customer billing services. The department has a wide variety of support divisions and programs to maintain the existing infrastructure that provide these integral services and strive to be a responsible steward of the City's physical assets. For more information, visit the [Web page](#), like on [Facebook](#), and follow on [Twitter](#).
