

Learn more about the South Ellerbe Stormwater Project

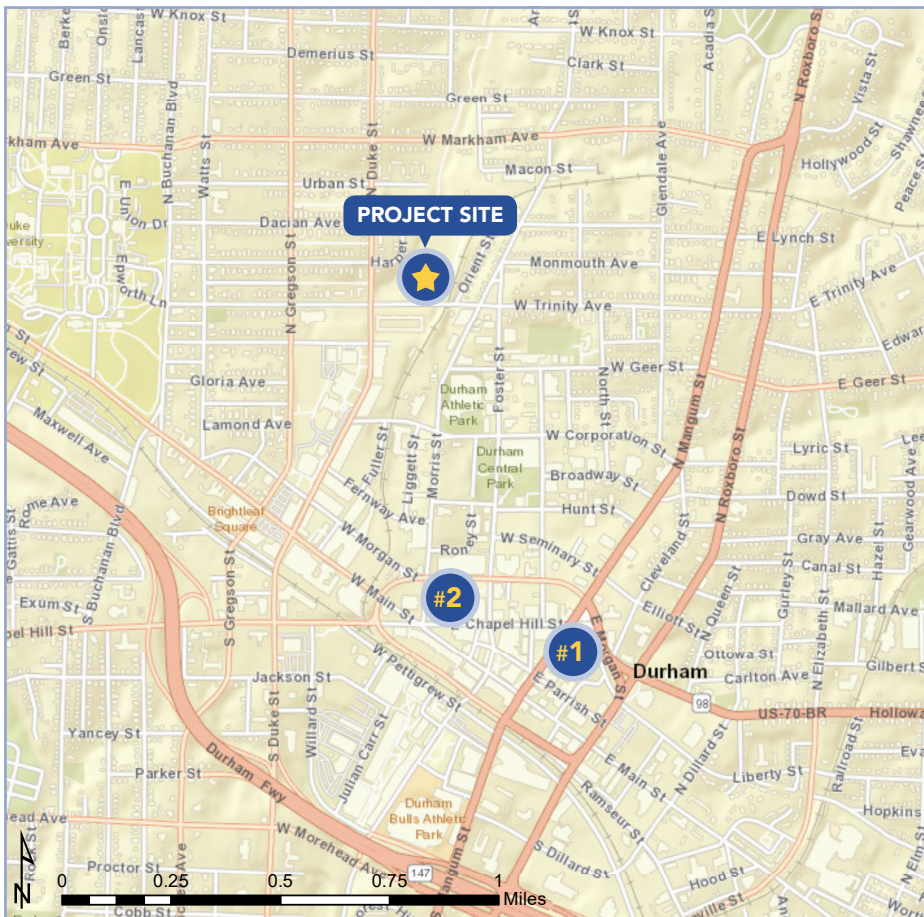

The City of Durham Stormwater and GIS Services Division (City) is planning a natural stormwater restoration at 808 West Trinity Avenue, the site of the former Duke Diet and Fitness Center. This nine-acre site, which is located along a South Ellerbe Creek tributary that flows into Falls Lake, is unique within Durham due to its size and location in the watershed. The stormwater restoration will filter the polluted runoff before it enters the creek and help the City meet the Falls Lake Nutrient Management Strategy Rules. In addition to improving the environment, the stormwater restoration will add value to the community by providing opportunities for viewing areas, outdoor seating, interpretive signs, and access to walking trails.

SUGGEST A NAME FOR THE SOUTH ELLERBE STORMWATER PROJECT!

To submit your suggestion, visit: www.NameOurStormwaterProject.com
Ultimately, Durham City Council will pick the name.

Engaging the public throughout the life of the project is a priority for the City. The City is seeking input from residents and other interested groups on the natural stormwater restoration proposed for the site. The public is encouraged to attend the upcoming public meetings to ask questions and provide feedback on the proposed stormwater restoration.
