Development Scenarios:  
Example RS-10 Urban Tier Infill

These are illustrative examples of the various types of housing that could be allowed under the proposed recommendations on a vacant lot located in a residential neighborhood zoned RS-10 in the Urban Tier.

Site Characteristics

Lot Width: 75 feet  
Lot Depth: 150 feet  
Lot Area: approximately 11,600 SF  
Zoning District: RS-10 in the Urban Tier, Infill Standards Apply

1. Density maximums can limit the amount of units in a development even if dimensional requirements can be met. Density maximums also do not currently apply to Accessory Units (ADUs). The current maximum allowed density is 5 dwelling units/acre, equating to ONE unit for this site. The proposed maximum is 9 dwelling units/acre for the Urban Tier, equating to TWO units for this site.

2. The Affordable Housing Density Bonus is available only to projects that meet minimum eligibility requirements per UDO Section 6.6, and enables a project to exceed standard maximum density requirements and receive lot area and width reductions.

3. Proposed "Small House" would not be held to a density limit.
Development Scenarios: Example RS-10 Urban Tier Infill

One single-family home

❌ Not allowed under Current Zoning
✅ Allowed under Proposed Zoning

Notes:
- Current zoning would allow one house to be built, plus an accessory unit; this development scenario would also be permitted under proposed recommendations.

Drawings are not to scale. For illustrative purposes only.

One Duplex (2 units)

❌ Not allowed under Current Zoning
✅ Allowed under Proposed Zoning

Notes:
- Proposed zoning rules would permit one duplex
- As the table indicates, using the Affordable Housing Density Bonus (Section 6.6) could allow more units to be built.
Development Scenarios:
Example RS-10 Urban Tier Infill

**Three Small Houses**

- Not allowed under **Current Zoning**
- Allowed under **Proposed Zoning**

**Notes:**
- A 75’ lot could be divided into three “Small Houses” where the building footprint and overall house size is capped.
- As the table indicates, using the Affordable Housing Density Bonus (Section 6.6) could allow more units to be built.
